For the saves of a lifetime...find out more overleaf !

calorex

Calorex heat pumps are the most cost effective way of reducing the impact on the environment and countering the rising price of increasingly scarce fossil fuels.

And now you can save twice!

GOVERNMENT GRANTS

Save One:

50% grant under the Low Carbon Buildings Programme Phase 2

Social Landlords As a registered social landlord, you can get a grant of 50% off the capital and installation cost of a Calorex heat pump system including the combined buffer vessel & DHW cylinder. This grant, available under the Low Carbon Buildings programme (LCBP) Phase 2E, applies to your retro fitting programmes as well as to new housing built for you by private developers.

Private developers The installation of a Calorex air source heat pump can secure the mandatory Code for Sustainable Homes Level 3 energy rating without changes to the building structure (a Calorex ground source heat pump will give you code level 4). When building social housing, make sure that the landlord is aware of his entitlement to a 50% grant.

Heating Contractors As an MCS accredited contractor, you can help your social housing customers to access their 50% grant – the cost saving could well tip the balance in your favour.

Save Two:

CALOREX PRICES CUT

Price reductions across the full heat pump range

Benefitting from increased volumes and a new manufacturing line, Calorex have reduced their production costs. These savings are being passed straight on to you with price reductions across their full heat pump range. Additional support is also available for contract volumes to help you to win business. Contact Calorex for your special terms.

and remember:

- LCBP grants are only available for MCS approved heat pumps and the full Calorex range is MCS approved.
- Calorex heat pumps supply domestic hot water at up to 65°C, without the need for direct electrical or solar thermal back-up.
- Calorex heat pumps are designed specifically for the UK climate and are built here in Britain.

Don't miss out.....Save big time with Calorex!
